

## Coal Output Gains

Marked gains in Alberta's coal output are reported by A. A. Miller, chief mines inspector for the province. Highest gains are in the bituminous field, the result of railway orders in expectation of heavy grain movements. Canmore is said to be building up a good Ontario market, and the odd mine reports a shortage of labor in the domestic coal field. Production from Jan. 1 to July 31 of this year totalled 2,579,699 tons, an increase of 14,811 tons over the same period last year.

## Masonic District No. 8 Held Annual Meeting

With members present from the seven lodges which comprise District 8, a fine meeting and banquet was held on Thursday last. The business sessions opened in the afternoon, the grand lodge officers present being George Moore, provincial grand master; J. W. H. S. Kemmis, grand secretary; J. O. C. McDonald, district deputy grand master, and many officials of grand lodge, including several past grand masters and district deputy grand masters.

Blairmore contingent was headed by Past District Deputy W. H. Chappel; Hillcrest by H. O. Westrup and Robert Creighton, Cardston by Canon S. H. Middleton, past grand master, and many others who have held high offices in the craft.

At 6.30 p.m. a very fine supper was served in the Oddfellows Hall by Minerva Chapter of the Eastern Star, under the convener'ship of Mrs. Adam Walker. The tables were prettily decorated, and everyone was delighted with the appetizing meal. Toasts proposed were "His Majesty The King and the Craft," by H. O. Westrup; "The Grand Lodge of Alberta," proposed by G. E. Cruikshank, response by George Moore, provincial grand master; "Our Visitors," proposed by G. Ryder Davis of Macleod, responded to by W. H. Miller of Granum; "His Majesties Forces and our Allies," proposed by George Kellock, response by Col. R. F. Barnes; "The Ladies and Artists," proposed by W. A. Ross of Pincher Creek, response by Mrs. Macgregor, worthy matron of Minerva Eastern Star Chapter; "The Junior Warden's Toast," proposed by Albert F. Short.

In addition to Alberta lodges, Elk River Lodge was represented by E. K. Stewart, Bro. Batchelor, present grand master of the lodge, and other members. Following the banquet an address was given by the grand master in the lodge room, the proceedings closing at 10.30 p.m.

### Coleman Glee Club

The selections by the Coleman Glee Club at the Masonic banquet were highly appreciated. Members of the club, under the leadership of Dr. C. Rose, were Miss Isa Ramsey, Miss Umie Johnson, Mrs. Rose, Reuben Johnson, Bert Bond, James Cousins, and Miss Sheila Devine, accompanist. In addition to the ensemble numbers by the club, Miss Isa Ramsey sang "Lassie of Mine." The club members were highly complimented on their fine singing.

### Home on Leave

Roy, Rose and Danny Foster, of the Calgary Highlanders, were home over the week-end, looking quite fit after their initiation into military training. They claim to have put on weight, and though military training was at first strange, they are getting in to their stride, and speak well of their accommodations in Calgary. Incidentally, The Journal is a welcome visitor weekly, a bundle being sent to them and for which they expressed their appreciation.

It won't sell if you hide it under a bushel basket—use Journal want ads.

## Youth Training Classes Resumed

With Miss Isobel McDonald and James Carlson as instructors, the physical training classes were resumed on Monday. The hours are as follows: On Monday from 6.45 p.m. to 8.30, ladies classes; from 8.30 the men's classes. On Friday evening the men's class meets first, followed by the ladies. The committee includes Reg. Jones, chairman pro tem; Edna Morris, secretary; Maurice W. Cooke, Mrs. Fauville, Mary Hoyle, Nels Fransson.

### Annual Banquet St. John Ambulance Association

On Saturday night in the Oddfellows hall the annual banquet, presentation of certificates, medallions and labels will take place, commencing at 7 p.m. states John M. Rushton, secretary. This is one of the enjoyable affairs of the year, and quite a number of out-of-town guests usually are present.

## WEDDINGS

### Sprout-Rypien Wedding

Many friends join in congratulations on the marriage of Miss Mary Rypien, to Mr. Dan Sprout, well known as one of the star players on the Canadians hockey team. The wedding was held on Saturday, Rev. J. T. Dunbar conducting the service at Holy Ghost church. A pretty feature was the six bridesmaids, daintily attired, namely, the Misses Mary Troz, Amelia Rypien, Nellie DeCocco, Joanna Yagos, Lily Suplat and Helen Galicia. The bride was attired in a floor-length gown of white satin. On her head she wore a silver sequin calot from which fell her shoulder length veil. Her accessories also were silver. She carried sweetheart roses and lilies of the valley. The bridesmaids carried lovely bouquets of garden flowers. Mrs. Dan Kolesnick (the bride's sister) was matron of honor.

Out-of-town guests included Mrs. Dan Sprout, mother of the bridegroom, of Winnipeg.

A reception at the home of the bride's parents was attended by a large number of friends.

Mr. and Mrs. Ken Blain and son of Kimberley were the guests of Mr. and Mrs. Jack Nash. Mr. Blain is now a bombardier in the artillery battery being raised in eastern British Columbia with headquarters at Cranbrook. There are about 60 men at Kimberley who have joined the artillery. Ken has a smart appearance in his uniform, and his friends will wish him good luck and more promotion.

### PROBABLE CHIEF OF AIR ARM

Sir Edward Ellington, now inspector general of England's air force, is expected to command the air force of the allies. Sir Edward, a 62-year-old bachelor, joined the Royal Air Force in 1913 and served in France from 1914 to 1918. He assumed his present position last January.

## Queen's Smile Heartens London

With the smile that bounded thousands individually to the crown when she visited Canada last May, Queen Elizabeth bolsters the courage of English civilian warriors. Here she is shown with Councillor Gordon Fisher, visiting the Abbey Division of air raid shelters on the day before England declared war against the Reich.

## Czecho-Slovak People Honor Steve Kubinic

First Slovak Soldier to Volunteer from Pass, Joined Calgary Highlanders—Presented With Wrist Watch

On Monday evening in the Catholic hall the Czecho-Slovak people of Coleman met to honor Steve Kubinic, who early in September joined the Calgary Highlanders, and who was home on leave over the week-end.

Mike Korman was chairman and addresses were made by Louis Kalivoda, Louis Bubniak, H. T. Halliwell. Opening with the singing of "O Canada," and the Slovak national anthem, following the addresses a presentation of a handsome silver wrist watch was made by the chairman on behalf of the people present.

Steve Kubinic lived in Coleman since 1925, and for several years worked for McGillivray Coal Co. He is the first of the Slovak people in this district to volunteer, and in B. Co. of the Calgary Highlanders, he states there are seven Slovak men. Dressed in the Highland uniform, Steve presents a smart appearance.

Lunch was served by the ladies, and after the presentation a dance was held, the music being provided by Fred Blazenko, violin; Charley Rayman and Tom Kropinack, piano accordions; Andy Vrsokry, clarinet.

As time for departure approached, the party marched to the bus depot, with music playing, and as a farewell guesture sang "O Canada."

### Thanks

The National Alliance of Slovaks, Czechs and Carpathians of Coleman wish to thank all those who helped in any way to make the party for Steve Kubinic a success.—The Committee.

Miss Mary McLutry, who recently went to take over a school 70 miles north of Edmonton, returned home this week owing to an attack of appendicitis, which may require an operation.

## Girl Guides Meeting Regularly

First Coleman Guide Company has been meeting regularly since the second week in September, and the addition of five new recruits was most welcome. Three came three weeks ago, one last week and another last night. Any girls who are interested would be wise to come to a meeting to see if they would care to join. Our Fall work will begin next week. Review of Guide law, etc. has taken up the few weeks we have been gathering.

The girls expect to be able to help with the supplies required by the Red Cross. The "group work" of one meeting was taken up by making dressings for the doctors, which we hope to do soon again.

A new patrol has been added to bring the number to five. Those holding the position of Patrol Leader are Frances Short, Thelma Williams, Patricia Emerson, Lillian Ford, Doris Jackson.

Monday, Oct. 9, being a holiday there will be no meeting.

## School Board Notes

Regular meeting of the trustees was held on Tuesday evening. Present Chairman Fraser, Trustees Sharp, Fleming and Greenhalgh.

It was decided to drop the lights in one of the classrooms six feet to find if they give better light. Should the test be successful all rooms in the high school will be dealt with in the same manner.

Principal Hoyle, in his report, stated that school attendance for September was 91%. He informed the board that a Mr. Turner, of Bellevue, was willing to give his time two nights a week for a month in order to teach pupils in arts and crafts. One of the local teachers would be present at these classes and he would take over the class after Mr. Turner had taught them the rudiments of the work. Pupils would have to buy their own materials, there being no expense to the board. Truancy during the past week had become a problem. However, it was expected this would be under control in a day or so.

Miss Gladys Lees secretary, was appointed to represent the board on the Red Cross committee.

### In Memoriam

GRIFITHS—In Loving Memory of Daniel Griffiths, who passed away on October 6th, 1937. Ever remembered by his loving wife, and daughters Doris and Mildred, and Mr. and Mrs. Fred Weir.

"Never shall you be forgotten, Never shall your memory fade; Sweet thoughts shall always linger Around the grave where you are laid. And when the shadows of night are falling,

And we are all alone, There comes a thought, dear Father, If you could just come home."

Ever fondly remembered by the family.

The east side. People living in these scattered areas enjoy to some extent the facilities provided by the town, and should share the expenses.

## Day of Prayer

Sunday, Oct. 8, is a day of national prayer—"of humble prayer and intercession to God" in the words of the Ottawa proclamation. The proclamation sets forth that Canada has been forced to take up arms in defence of its liberties unjustly attacked, and to prevent unprovoked aggression.

## Mike Lopichuk Died on Monday

Came to Coleman in 1934 and Played Right Wing on Canadians Hockey Team

For almost two weeks with his life hanging in the balance, Mike Lopichuk at up a brave fight, suffering from an infection caused by an abscess behind the ear, but an end came to his suffering at 10.45 on Monday night. He was 26 years old, and was born in Edmonton. His parents now live in Canmore.

It was about one year ago he was married to Miss Ann Spievak, to whom sincere sympathy is extended in her bereavement. His parents came down from Canmore on Wednesday, Joe Jerwa, the well-known defence man of New York Americans, and his brother Steve, driving down with them. A sister, Miss Olga Lopichuk, of Cochrane, and a married sister, are here for the funeral, which will be held on Friday at 10 a.m. from the home of Mr. J. Spievak, Blairmore road, and Mass at Holy Ghost church at 10.30 a.m.

The Lethbridge Herald, commenting on his death, states:

Mike Lopichuk was well known to Lethbridge and district hockey fans, having played here with the Canadians on many occasions. A hard-working right-winger, Mike stood six feet and weighed 175 pounds. A strong defensive player, he also did his share of goal-getting and his size made him a hard man to handle around an enemy net.

Lopichuk performed for the Coleman club for five years and established a reputation as a steady and reliable performer with that club. In 1937 he was chosen as a member of a Kootenay league all-star club which played Lethbridge Maple Leafs here in a Christmas Cheer game. He performed for Canadians last year in the Alberta League.

## THEATRES

CONFESSIONS OF A NAZI SPY  
Preview at Palace Sunday Night; At Bellevue Three Nights Next Week, Oct. 12, 13 and 14.

It remained for a motion picture company to bring home to us the whole shocking story of Nazi espionage activity in this country in a picture entitled "Confessions of a Nazi Spy." Warner Bros., first of the cinema firms to venture into Germany from Germany when the Nazis came to power, are the producers. When the company went into production with this picture, there were cries of "It can't be done" from all sides. Threats to the actors, the technicians, to all concerned, were received. Yet in spite of such obstacles, it has been done! For courage in bringing to light this menace at such risk, Warner Bros. are thus to be highly commended.

In July, 1939, the output of Alberta mines showed an increase of 46,773 tons over the same month of 1938. Crows' Nest Pass output for July, 1939, was 118,291; July, 1938, 100,071. All bituminous mines showed an increase.

Journal ads. are business-getters.

## The Problems Of War

The war in which Canada is currently engaged as an active participant may be expected to solve, at least temporarily, some of the problems which have sorely afflicted the country in the past few years. On the other hand, it may serve to accentuate some problems later on, if not now.

It is apparent, for instance, that in a war of even moderate duration, a wide scale relief problem is destined to vanish for the time being. Certainly, with the demand for man power for the fighting forces, for accelerated industries and to some extent for augmented agricultural effort, there should be none idle in the urban centres, except those who would normally be unemployed by reason of advanced age or physical or mental infirmity. Even some of the latter will, no doubt, find it possible to make some contributions towards their own support under war conditions.

In the rural districts, which will be called upon to supply allied belligerents with large quantities of foodstuffs, a widespread relief problem is almost inconceivable while the war is in progress, except where such a condition may be induced by complete crop failure over a wide area—a condition which it is hoped will not recur in the lifetime of the present generation. Even, however, if crop failure should occur as a result of drought or from any other cause, it is a reasonable assumption that many resourceful country residents would be able to find some more or less remunerative occupation in the larger centres, opportunities afforded because of the existence of a state of war.

### The Railway Problem

The war, too, may be expected to some extent to ameliorate the national railway problem. If Canada is to fulfill one of her principal missions in the war she will not only provide the allied fighting forces and their nations with large quantities of food, but also substantial supplies of arms, munitions, aeroplanes and possibly ocean bottoms, as well as raw materials for the processing of these and other commodities outside the country.

The transportation of such raw materials and finished commodities may reasonably be expected to furnish the railways with a very material increase in tonnage to the full extent of availability of rolling stock and just so long as the allied navies are able to keep the sea lanes between this continent and Europe open. Hence, as long as the war is in progress, a big increase in railway earnings may be expected with a corresponding shrinkage in deficits.

The war may also be expected speedily to terminate the expenditure of considerable sums of money on public works of the type now still being authorized by the federal government as unemployment relief measures. Not only should there be no unemployment requiring assistance in this or any other form, but the monies now being used for this purpose will undoubtedly be required for the prosecution of the war.

### Sacrifices In Progress

While the sharp curtailment or disappearance of these irritating problems may be anticipated for the duration of the struggle overseas, the other side of the balance sheet is destined to show some losses, temporarily at least.

For example, there is little doubt that the war will bring a halt to the demand for larger expenditures for social reforms, not only because the money which might have been allocated for such schemes under happier auspices, will be required for the more vigorous prosecution of the war, but also because improved economic conditions will reduce to some extent the necessity for such expenditures. In this category may be placed social projects as state hospitalization and medical care, extension of the old age pension plan and others of the type.

It is even possible that the exigencies of a prolonged war may, in course of time, necessitate reduction in expenditures for such highly essential services as education and public health, a contingency which, it is devoutly to be hoped, can be avoided. One of the surest ways of avoiding such a misfortune is to prosecute the war with such vigor and strength and unity of purpose and with all the available resources, that it will be brought to as speedy a conclusion as possible.

There are many cherished schemes, existent and potential, which may have to be sacrificed or curtailed before the war is over, but the most certain way to reduce these sacrifices to a minimum is to make the prosecution of the war the matter of greatest concern, and that, in turn, signifies a joint co-operative effort on the part of every citizen of the country. There is no one who cannot make some contribution towards a speedy termination of the war. Until the war is over, the social and economic progress of the country on a sound basis is bound to be hampered and delayed.

### Blackout Glass

Ingenious Lighting Scheme Has Been Introduced In France

In Europe much of the engineering ingenuity of the nations is currently devoted to the devising of ways and means to protect cities from the ravages of air raids.

One of the first rules of self-preservation in the event of night air raids is that no light should be visible light emanating from buildings. In France a simple but ingenious lighting scheme has been devised to stop night-time bombers. It consists merely of a combination of blue glass windows and orange lamps.

When the correct degree of coloring is attained, the rays of the orange lamps do not effectively pass through the blue window panes, and are thus invisible to aircraft at night. The blue windows will pass about 75 per cent. of the incident sunlight by day.—Brandon Sun.

### Will Serve Without Pay

Approximately 100 men have sent offers to the Voluntary Service Registration Bureau, Ottawa, to serve without remuneration in any capacity in which the government might need their services, the bureau revealed. One man who recently retired from a \$50,000-a-year executive job is ready to serve on a dollar-a-year basis.

If small indentations are counted, Maine has more than twice as much coastline as Florida.

Turtle racing is popular in Maldenhead, England, a ten-yard race lasting about an hour.

### Flying Salesman

Aerial Drummer Is Able To Cover A Lot Of Territory

E. W. Cleveland, who refers to be known as "Pop", is perhaps the country's foremost flying salesman. Pop, who sells airplane struts, has a territory that would make most salesmen hand in their resignations.

He covers the United States and Canada, but he covers them in a plane which has a top speed of 180 miles an hour and cruises at 165.

"I've been flying my territory since 1927," the aerial drummer said. According to "Pop", there are hitchhikers for airways, as well as highways.

"There's just one thing I demand of a passenger when I give him a lift," he said. "If there's no schedule to meet, and I see a spot that suggests good trout streams, he has to be willing to land with me and fish for a while. I always carry my tackle with me."

### Awarded Baly Medal

Dr. C. H. Best Of Toronto First Canadian To Receive It

The first Canadian to be so honored, Dr. C. H. Best, head of the Department of Physiology in the University of Toronto, has been awarded the Baly Medal by the Royal College of Physicians of England, an award made every alternate year to the person deemed to have most distinguished himself in physiology.

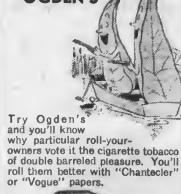

The medal, of the value of \$100, is customarily presented on the occasion of the Harveian Oration on October 18, and Dr. Best was awarded to be present.

Dr. Best has also been awarded the John Mallett Purser Lectureship by the medical faculty of Trinity College, Dublin, and hopes to be able to deliver the lecture a little later.

### One-Armed Man Clever

One-armed George Martin of Copthorn, England, can use a wheelbarrow and motor mower, dig, cut turf, prune hedges, fell trees, drive a three-horse team and catch four bricks at a time. Martin also plays golf, cricket and billiards, and is a good shot. 2327

THAT REMINDS ME—  
**THERE'S NO CLOSED SEASON FOR OGDEN'S**

### Noted Scientist

Professor Sigmund Freud Dies At His Home In England

Professor Sigmund Freud, 83, famed originator of psycho-analysis, died at his home in London, home recently. Freud left Vienna and came to England after German annexation of Austria last year.

The aging scientist arrived in London June 6, 1938, in search of "peace, study and work."

"I am looking forward to my future life with my students, my books and my studies in England," he said. "They let me bring some things out of Austria—just enough to work with. I still have my manuscript on the Bible and my own personal books and papers. Everything else—all my money and my property in Vienna—is gone."

With him when he came to England were his wife and their daughter, Anna, his son Ernst and a nephew, Harry Freud. The Jewish scientist was the first prominent Jew allowed to leave Austria after the German annexation.

At the time of his death, Dr. Freud, whose researches in the influence of sex on behavior won him world-wide fame, still was working on the book in which he intended to show how the Bible reflected the subconscious yearnings and fears of the peoples of antiquity.

### Is Working Long Hours

But Britain's Prime Minister Appears Healthier Under Strain

Prime Minister Neville Chamberlain, working harder in his 71st year than ever before, seems to be healthier and happier under the strain of war.

He seems to have new strength and a more youthful vigor. He walks with a light step and almost with a military air.

When Chamberlain speaks to Commons, his voice carries to every part of the House.

He works at least 16 hours a day, but still manages to carry out much of his peace-time routine.

Always an early riser, one of his first concerns still is to look at the flowers and birds in his garden before breakfast. Then Mr. and Mrs. Chamberlain take their morning stroll in the nearby park. And, best of all, his friends say, his gout has vanished.

### Must Be Licensed

Order-In-Council Now In Effect Governs Metals Exports

Metal such as copper and nickel may be exported from Canada only under license obtained from Hon. J. L. Halsey, minister of revenue, it was announced.

Licensing of such metal exports, a wartime measure, was authorized by order-in-council and the system has already gone into effect.

Licenses for export to the United States for consumption in that country are being given freely, government officials made clear. Then it is expected the licensing provision will exert little interference with normal business and trade.

The measure was taken partly to prevent valuable metals from being traded to the enemy and partly to conserve domestic supplies. It applies to all key metals.

Only death can arrest the homing flight of a homing pigeon.

Albania is to have 750 miles of centuries-old roads rebuilt.

### Message From Queen Mary

Expresses Admiration For Wonderful Spirit Of British Women

Queen Mary issued a message from Marlborough House expressing admiration for the "wonderful spirit" with which British women are meeting wartime emergencies and difficulties.

Her message read: I wish to express my admiration at the way my countrywomen have come forward in thousands to give help in the present emergency. The Queen, my dear daughter-in-law, has told me of the wonderful spirit shown all sides, of which she has found ample proof in her visits to various centres.

I wish to send a special greeting to all nurses, more particularly those belonging to services of which I am president—Queen Alexandra's Royal Naval Nursing Service and the Territorial Army Nursing Service.

I know that they will carry out their arduous duties in the splendid tradition of those services and I would like them to know that they have my good wishes wherever they may be.

At the same time, my daughter, the Princess Royal, asks me to join with her in sending greetings to all members of the Princess Mary's Air Force Nursing Service.

I am mindful also of the invaluable work of the Queen's nurses, who are exceptionally busy now in the reception-areas. It is my constant prayer that God's blessing may be on the merciful work of all nurses throughout the empire.

### Rates A Little Lower

Northern Points Favored On News Papers And Periodicals Sent By Air

A reduction in air mail rates on newspapers and periodicals to and from distant northern points was announced by Postmaster-General Norman McFarley.

The new rates, now effective, will affect distant settlements and mining camps in the Northwest Territories, British Columbia, Alberta, Saskatchewan, Manitoba and Ontario. Telegraph Creek, B.C., will be eligible for the reduction in winter only, the announcement said.

When mailed by the public, second class matter may be sent to such points at the rate of one cent for each four ounces or fraction of four ounces. Posted from the office of publication or from newsmen, the rate will be four cents a pound.

The regular air mail postage requires six cents for the first ounce and five cents for each additional ounce.

Lady (viewing pompous gentleman): "He's a baronet, eh? How did he get his baronetcy?" Friend: "Tobacco."

Lady: "How many coupons?" Ninety per cent. of tire troubles and tire accidents occur during the last 2,000 or 3,000 miles of the tire's life.

### War And Science

Many Advances In Human Knowledge May Be Expected

Every one is asking the question these days: What will be the effect of the war on this and that? What, for example, will be the effect of the war on science? Part of the answer to that question lies in the past. What was the effect of the World War on the science of that day?

In Germany great strides were made in chemistry, but it was partly the chemistry of poisonous gases. There was, however, the chemistry of synthetics, and German scientists developed a great many usable substitutes for the raw materials they could not get on account of the Allied blockade.

But not only chemistry benefited by the World War. British and French scientists made great strides in the development of the physical sciences of radio and aviation. And surgeons behind the lines everywhere added to their knowledge of human physiology, and their skill in patching up casualties.

All of these advances, however, were not exactly pleasant to behold, for they were made at the expense of a torn and bleeding humanity. It is not until one turns to the history of science in America during the War that one finds much joy in the picture. American scientists of that day kept themselves informed what was going on in darkened Europe, and at the same time devoted their energies to carrying on those developments that would bring permanent good for all mankind.

In that experience, then, there is an approximation of what the effects of this war will be on modern science. There will be advances in Europe at mankind's expense. America will carry the torch of pure research.—Winnipeg Free Press.

No white man ever saw one of New Zealand's strange big birds, the moa, which died out centuries ago.

Rust and corrosion cause an annual direct loss exceeding that caused by fire and flood combined.

### The Weeping Willow

Interesting Story Relates That Tree Came Originally From Syria

The weeping willow is an exotic in Canada, coming to the North American continent from the east through the agency of the English poet, Alexander Pope, states George A. Steven, son, gardener at the Dominion Experimental Station at Rothern, Sask.

The story goes that Pope was present when the cover was being taken off a box of fruit shipped to England from Smyria and observed that one of the sticks appeared as if it contained some life. He planted it in the hope that it would grow into something not known in England, and from this grew the willow tree that has given birth to so many others. During the American Revolution, a young British officer brought a sapling of Pope's tree with him across the Atlantic, and from it, it is said, have come all the weeping willows in North America.

Linnæus, the great botanist, named the tree, Salix Babylonica, or willow of Babylon, in allusion to the passage of the 137 Psalm, where the captive children of Israel are represented as hanging their heads upon the willows by the rivers of Babylon.

### Limit Of Air Speed

For Military Aircraft 600 Miles Per Hour Is Set By Expert

A 600 mile-an-hour speed limit for military aircraft was set by an expert at the British Association meeting at Dundee.

The expert is Mr. H. E. Wimperis, director of scientific research at the Air Ministry from 1925 to 1937 and president of the engineering section of the meeting.

A definite limit was being imposed by the laws of nature, he said. If rapid manoeuvre was required then the speed must be controlled to suit the conditions.

In regard to civil air services, Mr. Wimperis said that there were good economic reasons for speed to settle down in the 200 to 300 miles an hour range.

A new amusement device gives passengers the feeling of going over the Niagara Falls. Others get the same sensation by interviewing their bank managers.

## Squadron Leader Fights Enemy Planes In German Territory

London.—A proclamation issued by the King that will have the effect of calling 250,000 additional young men to the colors will be in importance with a ministry of information story of a drama of the skies in France in which a British squadron leader single-handed fought 15 enemy planes after they sent down four of his reconnaissance patrol deep over German territory.

The King's proclamation, called up all Britons between the ages of 20 and 22 for armed service.

The lone British plane, determined to complete the scouting mission on which it was sent, brought down two of the German craft and, although riddled with 40 bullet holes, succeeded in returning to the British lines, the information ministry's communique said.

Three of the original patrol of five planes were sent down and the fourth made a forced landing.

"An order had been given for an R.A.F. patrol to reconnoitre a particular position behind the German line in the most strongly defended part of the Saar," the communique said.

"Anti-aircraft batteries put up a fierce barrage, but our aircraft went through it successfully. When well over the frontier at a height of over 20,000 feet the squadron leader sighted the enemy. Out from behind a bank of clouds came nine Messerschmidt fighters. They approached from directly overhead, flying 2,000 feet higher.

"Away on the right another six swooped to attack. Reconnaissance was the work to be done. Nothing must stop it. The formation flew on. "The moment the fight started, the enemy tactics were revealed. Breaking formation, the Germans concentrated mass fire on each British machine in turn. Their method was to wheel, dive and come up over the tail of our aircraft.

"The intense fighting lasted 35 minutes. Three of our machines were shot down another made a forced landing, but one of the 12 men forming their crews eight were seen to escape by parachute.

"The squadron leader alone was left, but he flew on just the same to finish his job. Dodging, side-slipping and banking to get away from the concentrated enemy fire, he held his course and finished the reconnaissance while keeping up a steady fire. "His stream of bullets hit the engine of the leading Messerschmidt. The enemy machine swerved and in a second burst into flames and plunged to earth. Keeping up his fire, the gunner landed another burst into a second fighter. With black smoke pouring from the nose, it went down in a spin.

"Two hundred and fifty-nine rounds of ammunition had accounted for the enemy losses. The 13 remaining Germans gave up the fight.

"The navigator, the third member of the crew, kept his pilot on the homeward course, though his instruments were smashed and he himself was wounded in the forehead.

## Wealth Of Western Canada's Wheat Crop Reflected In Business

Winnipeg.—The wealth of western Canada's 1939 wheat crop has begun to make itself felt in the retail trade centres of the prairie provinces, a survey revealed.

A preliminary estimate indicated the new crop will pour more than \$246,000,000 into the pockets of prairie producers. The appraisal is based on the last government survey which estimated western Canada's wheat yield at 432,561,000 bushels. The 1938 wheat harvest of 326,000,000 bushels was valued at \$190,610,000. If it is true, this year's yield will be the greatest harvest since 1928 when 544,000,000 bushels of wheat were taken from western farms. In that year, farmers were enriched \$421,603,000.

Threshing operations have been completed in all but a few northern districts. Many farmers who have finished storing their grain or who have completed delivery to country elevators and terminals, are turning to towns and cities to replenish their stocks of machinery, clothing and other necessities.

Farm implement and machinery

"The aeroplane by this time was in a sorry way. There were 80 bullet holes in the fabric—the ailerons and rudder were damaged. Both the petrol tanks were burst and flooding the inside of the fuselage with petrol and fumes.

"As it crossed the frontier, the engine failed. From the starboard tank petrol poured through the bullet hole each time the aircraft banked. Stopping up the hole with a handkerchief, the pilot was able to save enough gas to get home.

"The landing had to be faced with the retractable undercarriage jammed. It was a hairy open and the offside tire was shot away.

"As the machine touched ground, it spun in a circle, cartwheeling over on one wing, and caught fire. The navigator was flung out on his head with his clothes on fire.

"The gunner was jammed inside, but, without a thought for his own safety, the navigator hauled him out and smothered his blazing coat with his bare hands."

### Aid For Poles

Could Be Handled Through Red Cross In England

Winnipeg. J. H. Woods, president of the Calgary Herald and publicity chairman for the Canadian Red Cross, suggested aid for Poland raised in Canada be handled through the Canadian society's committee in England.

Methods by which money and goods could be sent to Poland without falling into enemy hands were the work to be done, he said. Mr. Woods is returning to Calgary from a meeting of the national council of the Red Cross in Ottawa.

Tribute to the Dominion government's organization of Canada's war effort was paid by Mr. Woods. "Considering the enormous difficulties of the task the government has been working hard and efficiently," he said.

The first duty of every citizen at a time like this is to be generous and tolerant towards those in authority and not to jump into criticism until it is very badly required."

### No Sugar Shortage

Adequate Supplies Have Been Obtained From West Indies

Ottawa.—Adequate supplies of raw sugar for Canadian refineries have been obtained from the West Indies through the British authorities, and there is no sugar shortage in Canada, officials of the wartime prices and trade board, headed by Hector B. McKinnon, declared.

Many suggestions have been made that import duties on sugar be dropped, but such a move will be taken only as a last resort in event of an acute sugar famine facing this country, it was learned.

Until British sources, such as the West Indies, are exhausted, which is considered an unlikely contingency, British sugar will continue to enjoy tariff protection, it was made clear.

### Poland's Gold Stock

Part Of Funds To Be Held At Roumanian National Bank  
Bucharest, Roumania.—Part of Poland's gold stock, deposited "in transit" at the Roumanian National Bank, will be held at the disposal of the Polish government, it was reported in Bucharest.

The present Polish government, headed by President Moscicki, is in danger in Roumania, but it was reported that a new government would be established in France and that some of the Polish archives and the national seal already had been sent there.

Reliable Polish sources said that the formation of a new government awaited only word from Ignace Jan Paderewski, the Polish pianist and patriot, as to whether he would head it. It was said that Moscicki had indicated his willingness to resign, thus dissolving the whole government, including the cabinet, if he could be certain the future of Poland was "in good hands." Paderewski, first premier of modern Poland established after the World War, is immensely popular with the Polish people.

At Zurich, Switzerland, where Paderewski lives, his secretary was to have said no offer had been received from representatives of the Polish government.

It was believed that if the interned Polish officials resigned, they would be released as ordinary refugees and permitted to go to France.

### Food Production

Formulate Plans For Agriculture During War Time

Ottawa.—Hon. J. G. Gardiner, Dominion minister of agriculture, urged a conference of federal and provincial agriculture officials to keep in mind the end of the war.

Plans formulated for agriculture during wartime should not leave the industry disrupted when hostilities end, he said.

Plans for placing Canada's food production on a wartime basis to meet both immediate and future needs of the Allies and the people of Canada were discussed.

The agricultural supplies committee, composed of heads of the several divisions in the Dominion agriculture department, met provincial ministers and deputy minister of agriculture and other Dominion agricultural officials in conference.

A. M. Shaw, marketing director and chairman of the agricultural supplies committee, who presided over the meeting, outlined present federal organization and responsibilities regarding foods and agricultural production.

### Would Join Allied Forces

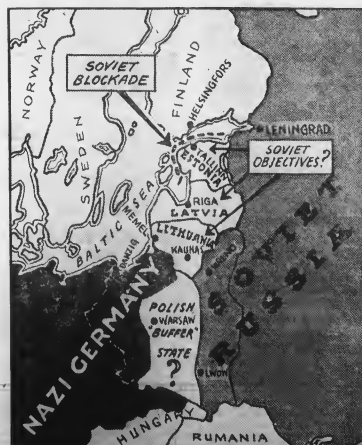

Polish Army Flyers Land In Scotland After Hazardous Trip

London.—The Daily Herald reported nine Polish army flyers had arrived at an airport in Scotland after a hazardous flight from Poland in three tiny combat planes.

"Everywhere there were fighter planes and anti-aircraft fire to challenge our progress," the Polish flyers said. "Several times we barely escaped destruction. As we crossed frontiers we were challenged, chased and fired upon.

"Now we want to join the forces of the Allies and fight again. We have got in touch with the Polish embassy and are awaiting instructions from our government."

### WILL RUSSIA REVAMP THE MAP?

The tiny states of Estonia and Latvia and Lithuania on the Baltic, dependent for their existence on the mutual interest of Germany and Russia in their independence, now tremble, fearing possible moves by Russia to absorb them. Estonia's coast was reported blockaded by Russia's navy.

### SURVIVOR

Agnes Chapelle, of Hamilton, Ontario, one of the survivors of the torpedoed liner "Athenia", which sank 200 miles off the coast of Ireland while en route to Canada from Liverpool.

### Attack On Fleet

German Planes Driven Off After Suffering Losses

London.—Winston Churchill, first lord of the admiralty, announced in the House of Commons a squadron of British warships was attacked in the North Sea by 20 German planes but that none of the naval units was hit.

Mr. Churchill said: "No British casualties were reported but one German flying boat was shot down and another was damaged. Another German aircraft came down and we sent a destroyer to collect her and her crew of four who were brought in as prisoners."

The admiralty chief said Sir Charles Forbes, commander-in-chief of the home fleet, had wirelessed as follows:

"Yesterday afternoon in the middle of the North Sea a squadron of British capital ships, together with aircraft carrier, cruisers and destroyers, was attacked by about 20 German aircraft. No British ship was hit and no British casualties were incurred."

"One German flying boat was shot down and another was reportedly damaged."

Mr. Churchill added that another German aircraft came down in the North Sea.

### Grain Storage

Pleanty Of Room For Grain At Saskatoon Elevator

Saskatoon.—Officials of the federal government elevator said they saw no reason why wheat sold to the Canadian Wheat Board could not be consigned to the Saskatoon elevator.

"I have heard nothing about such a regulation," said R. Seddon, in charge at Saskatoon. He explained that the elevator, which has a capacity of 5,500,000 bushels, was about a quarter full at the present time. "I would say we are unloading about 150 cars of wheat here daily," Mr. Seddon said.

### German Propaganda

Budapest.—A Polish officer who flew here from besieged Warsaw told newspapermen that on some "captured" German prisoners we found pamphlets promising them that by Christmas Propaganda Minister Goebbels would speak to them from London. The officer was Lieut.-Colonel Mateusz Izycki.

## French Troops Keep Up Pressure All Along German Lines

### Canadians In London

Canada House Is Busy Spot In War Emergency

London.—Canada House, barricaded with sandbags, a handy dugout in the basement and its windows boarded, throbs day and night with the countless activities attendant upon serving the Dominion's interests in wartime.

In historic Trafalgar Square, shrouded in nightly blackouts, the offices of Hon. Vincent Massey, high commissioner for Canada, form the nerve centre for such varied operations as:

Assisting Canadians stranded in Europe.

Helping Canadians affected by war emergencies, of which the torpedoing of the liner Athenia was an outstanding example.

Keeping the Dominion advised of new trade regulations pouring in a stream from departments and sub-departments of the British government.

Keeping Ottawa informed by confidential cable of diplomatic developments.

Dealing with various proposals, such as offers of country houses for use as hospitals and rest places in event of Canada sending an expeditionary force.

Handling a huge and often tiring correspondence from veterans pleading for a chance to fight again, girls of 16 want to serve as nurses, English youths who want to serve in the Canadian forces because their fathers did in the first Great War.

Mrs. Massey is taking a leading part in organizing women in the Canadian community here.

Some members of the staff are sleeping at Canada House. Files and records are kept in cardboard boxes in case Nazi bombing planes make it necessary to move to the country.

Streams of Canadians seeking information on passage back to Canada pass between Canada House and the nearby immigration office, also under the high commissioner's supervision.

### Mayor To Enlist

Mayor Croll Of Windsor To Join As Private In Scottish Regiment

Windsor, Ont.—Lieut.-Col. Arthur Pearson, officer commanding the Essex Scottish regiment, announced that Mayor David Croll had passed his medical board tests in "A" category and is eligible for enlistment as a private in the Essex Scottish. Colonel Pearson said Mr. Croll will soon take a place in the ranks. Mr. Croll said he had no comment on the report. He will apply for leave of absence from his mayoralty post. Enlistment does not affect his seat in the Ontario legislature, where he sits as a private member representing Windsor-Walkerville.

The 38-year-old lawyer was born in Moscow, the son of a poor Welsh cattle dealer; his first work in Windsor was shining shoes on the street, running messages, and selling newspapers.

After the 1934 Ontario elections he was made minister of public welfare and municipal affairs.

## First Canadian Expeditionary Force Now Being Organized

Ottawa.—All parts of Canada will be represented in the first overseas division of the Canadian Active Service Force now being organized, Hon. Norman Rogers, minister of defence, announced. So far as possible representation will be on the basis of population.

The active service force, Mr. Rogers said, includes a reserve force of two divisions with a quota of auxiliary (auxiliary) troops. From this one division will be sent overseas when required and a second division will be kept under arms as a further measure of preparedness.

Certain technical units from the reserve force will be sent overseas, and these will eventually form part of the overseas force. Despatch of all units will depend on discussions now in progress with the British government.

In organization of the active service, the department used the exist-

ing machinery of the non-permanent active militia instead of setting up a new organization as was done in 1914. This makes representations of all parts of the country in the proposed overseas divisions taken, in that it is created from complete militia units.

Mr. Rogers said undoubtedly officers and men of many fine units which had not yet been called on to mobilize would be disappointed, but a long view should be taken. The plan adopted had enabled mobilization of the force to be carried out smoothly and without confusion.

The primary motive underlying mobilization of two divisions and auxiliary troops was to create a force immediately available for action anywhere in Canada on a plan which would provide a force for overseas if desirable. The decision had now been made to send a division overseas and the units to comprise it would be announced later.

Meanwhile pressure is being kept up all along the German line, as indicated in an army communique, which said:

"There was enemy artillery fire in the region east of the Saar (river), notably south of Deux-Ponts (Zweibrücken) and Pirmasens."

"There was activity by reconnaissance and observation air forces on both sides."

Aided by perfect weather, British and French planes have dared enemy aircraft fire during the last few days to follow the Rhine deep into Germany, and have regained their bases unscathed, with valuable information.

French aviation circles claimed Allied planes had been proved superior in all air battles to date. Even when hit, it was said, most of the Allied planes have been able to land behind the French lines or even reach their bases.

### Show Fair Increase

According To Figures Employment In Canada On Upward Trend

Ottawa.—Employment in Canada has not yet begun to register any marked wartime expansion, which is not generally looked for for several months, but the official figures for Sept. 1 show a definite increase in the iron and steel industry—when the seasonal trend is ordinarily downward.

In the monthly review just issued, the bureau of statistics announced an increase of 20,247 in employees of 11,856 reporting establishments. Each with more than 15 employees.

The total for Sept. 1 is 1,165,631. While the improvement was widely distributed, the manufacturing industry added 13,100 to the payroll during August, greatly exceeding the average increase for the period. Vegetable foods and textiles showed big seasonal increases and iron and steel reversed the usual trend and also went up.

The official report describes this phenomenon as "especially interesting" in view of the fact that employment there has declined in 13 of the last 18 Augusts.

### Left Large Estate

Hollywood.—Carl Laemmle, Sr., 72, pioneer motion picture producer, left an estate estimated at \$4,000,000, he will disclosed. In addition to his two children, Carl, Jr., and Rosabelle, to whom the bulk of the estate was made for his two brothers, his secretary, and family servants.

In most European lands, Christmas is celebrated for a longer period than in the United States, often lasting until Twelfth Night, about Jan. 6.

### NOTES AND COMMENTS

WINSTON Churchill's broadcast on Sunday left no doubt on the attitude of Great Britain towards Hitlerism. France is in accord and people of the Commonwealth of Nations will support that attitude. The price of liberty may be high, but liberty always has been dearly earned through sacrifice and the maintenance of high ideals. It is to be preferred above all else to the dictatorship of a fanatical man lusting for conquest.

HENRY FORD may be a famous man as a manufacturer of automobiles, but as a commentator on the war his remarks are the most insane of any heard so far. Having been invited to the American Legion's 21st annual convention in Chicago, doubtless he decided he would say something pleasant to the palate of those in the United States who care not if Democracy stands or falls in the present conflict, as long as it does not affect them.

Expressing his opposition to President Roosevelt's proposed changes in the Neutrality Act, he stated:

"If we start shipping guns and ammunition over there we'll be in the war right away. If I were put on the stand, I'd say there isn't any war to-day. The whole idea is to get us into it and make it a war."

"If anyone believes that lifting the embargoes would mean even a temporary prosperity in this country he is very much mistaken. We would have a much greater prosperity if we keep out of war than if we go in, even temporarily."

He said he had not joined any organization attempting to influence Congress relative to the European crisis.

"I prefer to be perfectly free," he declared.

The most ridiculous portion of his address was as follows:

"This so-called war is nothing but about 25 people and propaganda. Get them and you'll have the whole thing. They want our money and men." He stated that if the United States kept out of the European conflict that war would stop—"if it really is a war."

Possibly Mr. Ford is getting into the condition of a venerable man, now in his dotage.

SOME YEARS ago the provincial government took preliminary steps towards the laying out of a park at Crows Nest Lake, and surveys were made. The depression came along and the provincial parks board passed out of the picture. However, the land in 1924 was leased for 21 years to Blairmore and Coleman, for recreational purposes only. The terms of the lease have been ignored, and buildings have been built in contravention of the terms of the lease. This land was leased for the benefit of the people. It is not within the powers of the council to abrogate the terms. It is time the people interested themselves in this spot, for if present conditions continue, there will in time be no lake shore available for recreational purposes. Instead of an attractive place, it is becoming an eyesore, a blot on the landscape.

PROPAGANDA is widely used by the belligerents, particularly by Germany in attempting to influence opinion through newspapers on this side of the

Atlantic. It is reported on good authority that some papers coming to Coleman are partly subsidized by the German government, the object being to influence opinion among people from Europe who do not read the English language newspapers very closely, if at all. People should be very wary of accepting statements made in these newspapers, for it is well known that not only in the foreign language newspapers of Canada and the United States is propaganda being carried to favor Germany's cause, but in the South American countries large sums have been spent to spread propaganda by means of the printed word. Out of conflicting reports and viewpoints the individual has to try and sift the true from the false in order to obtain a true picture of the development of events.

AN UNUSUAL feature among weekly newspapers was that of the Bowmanville Statesman. A recent issue featured "Go-to-Church Sunday" by publishing photos of the clergy and their churches, and editorials written by the clergy. It was a striking feature which evoked much favorable comment. The titles of the editorials were: The Church and Your Community; The Vacant Pew; The Rural Church; The Church Needs You and You Need the Church. The most amusing one was entitled Sleeping in Church, a practice which many are guilty of.

THE minister who wrote it had intimate knowledge of the subject. He says among other things:

"If the root causes of such church siestas can be discovered and removed, the matter will cease to be a thorn in the ministerial flesh. While we do not profess to be a student of any type of chology, as we see it people snooze in church because, for one thing, the speaker may be uninteresting or unintelligible. He perhaps reads his sermons and thus fails to keep his listeners awake with the roving and hypnotic eye. Or he may pause too long between phrases, thus allowing some weaker brother to toddle off into the arms of Morpheus. Or he may be a whispering crooner who can not be heard, or a thundering basso profundo who produces congregational deafness through concussion of the ear drums. If he is none of these—perhaps he has such a homely face, that the people listen with their eyes shut, and as a result drift into the land of nod. What we are trying to say is that before the minister pours the vials of his wrath on people's heads for sleeping in church he should first see if any cause for such a performance lies in himself."

Councillor W. White went to Edmonton for a conference of mayors of cities and towns on amended relief policies of the Federal and provincial governments, in place of Mayor Pattinson, who was unable to attend.

### Pucksters Win Ringland Cup

Light can faintly be seen on the baseball horizon this week as two teams vehemently claim to have won the league schedule and custody of the Ringland Cup.

The Michel-Natal Buffaloes have claimed the league championship for the past few weeks owing to Coleman having failed to finish the schedule. This claim is nullified when it is known that Fernie defaulted to Coleman giving Coleman the league leadership over Michel by

several percentage points.

On Sunday the two teams were scheduled to play at Blairmore for the Ringland Cup but Michel-Natal maintained their stand that they had the cup already won and refused to play. President Fred Gregory had assured Angelo Gentile he would travel to Michel and take custody of the cup and present it to the Pucksters as league champions for 1939.

Angelo Gentile has announced that a knock-out tournament between all league teams will be held at Blairmore on Sunday next for the Goddard Cup.

### Who Would Go Back To Candles And Lamps

WE have become so accustomed to electric light and power that we take it for granted. Yet it is a wonderful servant, and has lightened labor not only in industry but in the home. The low rate at which it is supplied places it within the reach of all people in communities served by an efficient lighting system. Use plenty of light to save eyestrain.

### Coleman Light & Water Co. Limited

## The Wheels of Industry Must be Kept Turning

WAR'S demands will increase work in many industries, and Canada's wholehearted co-operative efforts will back up the armed forces who fight the battles.

WARS are not only fought in the front lines, but also in fields of manufacture and supplies behind the lines. Canada takes an important part in that field, and the coal industry will do its share to back up the national government.

STEAM COALS of the highest grade will continue to be in demand from the local mines, which are equipped with the most modern plants of high efficiency.

## Open Season on Prairie Chicken and Ruffed Grouse

Owing to the southern boundary of the open zone for the above being inadvertently omitted from the regulations printed on the reverse side of the Bird Game Licenses and on the posters, some confusion has arisen. Therefore, it should be clearly understood there is no open season whatever on the above birds this year in the province of Alberta south of the main line of the Canadian National Railway, starting at Butze in the East and running through Wainwright to the city of Edmonton, thence west through Edson to the boundary of the Forest Reserve, just west of Ennare.

**Welcome Letter**  
Writing from Chemainus, B.C., Mrs. Phillips, a former Coleman resident writes:  
I am sending to renew my subscription for two years. We look forward to every Monday to see how Coleman is getting on. Although it is ten years since we left Coleman, we still call it home. We were sorry to hear of Mr. Heibin's death, as he was an oldtimer. I would like to wish every one in Coleman success and also the boys who have joined the army. There is quite a number here, too. We wish you success.—Mr. and Mrs. Phillips.

An ad EVERY WEEK in this paper is the BEST way to win business.

## The Churches

### St. Alban's Church

Rev. J. R. Hague, A. Th. Incumbent. Trinity XVIII. 8 a.m. Holy Communion; 11 a.m. Communion and sermon; 2 p.m. Sunday school.

Harvest festival services were held on Sunday, and the church was beautifully decorated by the ladies of the congregation.

### The United Church

On Sunday morning the annual Rally Day service will be held. This is one of the big occasions in the life of the school and the congregation. They will as usual meet together and there will be no session of the Sunday school. Again this year we want to stress the idea of a family service. Parents are asked to co-operate and come with the children. A small piece of silver in addition to the regular offering might be given, as the Sunday school offering for the day is devoted to the school's missionary gifts. Former members of the school are especially invited.

The Sunday evening service is improving in attendance each Sunday. With the choir again at work this improvement should be maintained. With such serious days ahead of us we might do well to be a little more serious and regular in the matter of personal faith and our allegiance to the Church. Those with no other church affiliation are cordially invited to worship with us.

## Pastoral Letter Read in Holy Ghost Church

On Sunday Rev. J. T. Dunbar, parish priest, read a letter from the Archbishop of Edmonton, John H. MacDonald, and the Bishop of Calgary, Francis P. Carroll.

Prefacing the letter with an exhortation to Catholics to be ready to assume their full share of the national burden, it proceeds, in part:

"For this reason we unhesitatingly proclaim the duty incumbent upon our people of rallying to the support of our Canadian Government in the measures it has adopted, or may adopt in future, for the successful prosecution of the war. Much as we love the pursuits of peace, we realize that there are times and conditions that call for the use of force. If ever such an occasion has existed in the world it exists to-day. This is more than a fight to save a small nation from the depredations of a larger one. Far bigger issues are at stake. We have heard much in recent years of the gradual division of nations of the world into two opposing camps—for God and against Him. Every indication is at hand that this division is now taking definite form; from which it follows that by taking the side of Britain and France, Canadians are preparing to strike a blow for the maintenance of Christian principles."

"Canada, as an integral part of the Empire, has associated herself with Britain and France in what we feel is a war not only for our country but also for our God and our Church. Patriotism is a part of the Catholic creed. It is not a mere sentiment, but it is a love of country, its culture, its traditions, its language, its social and economic welfare and its territorial integrity; a love great enough to inspire us to heroic efforts to promote our internal prosperity, and strong enough to cause us to resist aggression."

Alberta's army units in the Canadian Active Service Force are now at strength, with about 4,000 men, and naval recruiting stations have more men than they can accept right now.

## Local News

Mr. Craig Furlong is a visitor at the home of Mr. and Mrs. J. Fairhurst.

Mr. Campbell, of Erickson, B.C., was the guest of his daughter, Mrs. Russell Vincent last week.

Recent arrivals from Czechoslovakia to Hillcrest were Mr. and Mrs. Louis Kontroz, and their young son.

Dr. Aiello is a sadder and wiser man. He loaned his automobile to a friend, and another car smashed into it, doing considerable damage.

Group number 4 of the Ladies Auxiliary St. Paul's United church held a very successful tea on Saturday afternoon at the home of Mrs. Walter Dibblee.

Mike Opulski has been appointed as an additional member of the Polish Society to act on the general committee of the local Red Cross Society.

Tom Siska and Joe Wavrecan have been appointed as representatives of the First Slovak Benefit Society to the general committee of the Red Cross Society in Coleman.

The oldest Freemason at the district meeting last week was Mr. Gray, of Pincher Creek, who despite his 89 years can tell a good story and is a remarkably vigorous man.

Wm. J. McGrath, Coleman's pioneer barber, has moved from the building next to Aboussafy's store to the Gentile building, opposite the Grand Union, where he will welcome his old customers as well as new.

If The Journal waited till Thursday before getting material ready to publish, it would be a "lousy" looking paper (pardon the expression). If you want a good looking advertisement, you must take time and give the printer a fair chance to set it up in good style.

Dr. and Mrs. T. Keith MacLean are now settled in Vancouver, the doctor's office being 322 Birks Building. To keep in touch with Coleman news, The Journal is mailed to them every week, as they lived here for about four years and like to know the "doins" of the Pass towns. Old friends here are pleased to hear of them.

Mr. and Mrs. Steve Leosky, Mr. and Mrs. Louis Bubniak and Mrs. Gedjos motored to Drumheller over the week-end. Mr. Bubniak addressed the Czechoslovak people there on the activities of the people in the Crows Nest Pass in connection with the war. About 30 Czechoslovak men have enlisted from that district.

Prize winners at the Pythian Sisters' whist drive held on Sept. 13 were Mrs. L. Caroe and Mrs. J. Richards; Mrs. Jenkins winning the numbers prize. The quilt was won by ticket number 326 held by Mrs. H. Robbins of Blairmore. The cake donated by Mrs. Russell Ferguson, was won by Mrs. Kilgannon with ticket number 1.

The annual convention of Alberta Division of Canadian Weekly Newspapers Association will be held on Friday and Saturday at the Macdonald hotel, Edmonton. L. W. Brockington, K.C., head of the Canadian Broadcasting Corporation, will speak at the closing luncheon on Saturday, sponsored by the Grain and Milling Exchange of Winnipeg.

Mrs. D. A. MacKinnon of Kimberley made a brief call on Mr. and Mrs. Neil MacKinnon, Sixth street, last Friday, on her return from Calgary, where she had spent a few days. For many years she has been a subscriber to The Journal, having lived here before moving to Kimberley, and she was a welcome caller at The Journal office, to renew her subscription.

Better Light...  
Better Sight

## Everyone Needs Good Light

Have you enough light in enough places to protect eyes from strain? If not, ask your dealer about the proper sizes of sight-saving Edison Mazda Lamps.

**EDISON MAZDA Lamps**

CANADIAN GENERAL ELECTRIC CO. LIMITED

Take Advantage of these prices and enjoy plenty of light at low cost.

We have every type of lamp and also General Electric Appliances on sale.

## Pattinson's Hardware Store

Phone 180 for Orders Large or Small. Service Unexcelled

## LOSE POUNDS-GAIN PEP on the new BREAD DIET

### Follow this Bread Diet Plan

This Diet Plan gives about 1600 Calories a day—the reduced allowance of the average woman.

#### BREAKFAST

1 glass fruit juice  
Small serving meat, fish or eggs

2 SLICES TOAST, 1 sq. butter  
1 cup coffee (cold), 1 tsp. sugar

#### LUNCH OR SUPPER

Moderate serving meat, fish or eggs. Average serving 1 green vegetable

2 SLICES BREAD, 1 sq. butter  
Average serving fruit salad

#### DINNER

1/2 glass fruit or tomato juice  
Generous serving meat, fish or fowl. Average serving 2 vegetables, 1 green

2 SLICES BREAD, 1 sq. butter  
Small serving simple dessert

1 cup coffee or tea (cold), 1 tsp. sugar

TO gain a slim, lovely figure no longer means an extreme diet, with fatigue... weakness... "nerves". The new Bread Diet takes off excess pounds with safety. Science has proved that

bread is a combination of protein and carbohydrates that gives you energy and helps burn up fat. Reduce on the safe bread diet. Eat 4 slices of bread every day.

## Bellevue Bakery

Phone 74w, Bellevue.

J. Shields, Local Dealer

## Keep Your Local Printers Busy

GOOD PRINTING requires knowledge of experienced workers. Printing is art acquired after several years training. Business men's stationery is an indication of the kind of business they operate. Always use stationery printed at the Journal office. Most of the money spent for it comes back to local merchants, therefore it is good

business to reciprocate and in addition get work that pleases.

The Catholic Ladies Aid of Holy Ghost Church will hold their annual bazaar on Saturday, Nov. 25, in the Italian hall. This annual event is always looked forward to, and you are reminded to remember the date and help to make the bazaar a success as in the past.

WORLD HAPPENINGS  
BRIEFLY TOLD

An embargo has been placed on the export of scrap iron and steel from Canada to all countries except Canada's wartime allies.

Following passage of Ontario's revised Succession Duty Act, Premier Hepburn announced a new drive for collection of taxes from old estates.

Hon. Norman Rogers, defence minister, said in a statement the Canadian Medical Association has offered its full service to Canada in war effort.

A special permit must be obtained from the Canadian government before United States planes may fly to Canadian airports, a transport department official said.

More than 200 persons were reported killed in an earthquake said to have caused the caving in of more than 1,000 buildings in the Smyrna region in Turkey.

Mayors of the nine largest South African cities have approved a proposal by the mayor of Johannesburg to raise £1,000,000 by popular subscription to buy food for Great Britain.

The government will send overseas no soldier under 19 years of age and will not call up for overseas service anyone below the age of 20 under the National Service Act, War Secretary Leslie Hore-Belisha told the House of Commons.

C. H. (Punch) Dickens of Winnipeg, general superintendent of Canadian Airways, said the company will maintain its air services despite the war. The line has lost seven pilots to the Royal Canadian Air Force, he said.

Dean F. M. Clements of the University of British Columbia faculty of agriculture thinks British Columbia should increase its agricultural output and stop imports of food-stuffs from the prairies. "Prairie produce is needed by the Allies," he said.

## Reindeer Moss

Found Abundantly in Canadian Northland, It Has Many Uses

The gathering and packing of reindeer moss, one of the lichens, a little known forest product, which grows extensively throughout Canada, for decorative purposes has commercial possibilities, according to the Dominion Forest Service, Department of Mines and Resources, Ottawa.

This moss-like material is particularly abundant in the Canadian Northland, where it is an important source of food supply for the barrenland caribou. Mixed with flour this lichen also may be baked into bread or biscuits, and early French voyageurs to Canada are said to have used it for this purpose.

In Norway this lichen is widely used for stock food, and in that country the merchandising of it as a decorative material has developed into a substantial industry. It is ideal for making centrepieces, wreaths, dish gardens, terrariums, and other ornamental decorations. Each year large quantities of Norwegian lichen are sold in the United States for Christmas decorations, and at the New York World's Fair it has been used extensively as hedges and trees in dioramic displays.

## Honey Shipments

Canada's Exports To Great Britain Increasing Rapidly

The development of Canada's exports of honey to the British market has been spectacular. From a trade so small in volume before the Great War that it was not shown separately in the British trade returns, honey exports from Canada to the United Kingdom have grown by leaps and bounds until Canada is now the largest individual supplier of honey to the British market which draws its honey supplies from all parts of the world. In 1938 Canada exported 31,121 cwt. of honey to the British market as against 17,127 cwt. from New Zealand, 16,665 from the West Indies, 8,479 cwt. from the United States and 6,620 cwt. from Australia. In these measurements, the cwt. equals 112 pounds.

## Must Be Well Fed

Hens to do well must be fed well. Turned loose to pick up their feed, they won't do well. They may get along for a time during the summer, but they never will produce a lot of good eggs. Feed balanced rations and provide limestone or oyster-shell and plenty of good, clean drinking water.

Over 400 years ago Leonardo da Vinci observed that trees in northern Italy formed growth rings which differed in dry and wet years.

Unemployment is rapidly decreasing in Scotland.

## Production To Continue

Bata Shoe Plant Will Not Be Affected By War

Increasing activity in all branches of the plant has been noted at the Bata Shoe Company's Frankford location near Belleville, Ont., and 272 workers are now being employed there.

Outbreak of war in Europe will not result in any noticeable changes either in production, output or future plans, it was learned definitely from Thomas Bata, head of the Canadian company.

"We anticipated just such an event several months ago," Mr. Bata said, "and we made our plans accordingly. That is one of our strong reasons for wishing to begin manufacturing in Canada. I can safely say that the war in Europe will not change our plans in any respect."

With the 272 now employed, Bata officials state that something less than 300 pairs of shoes per day are being turned out. The work in the production department is, as yet, almost wholly instructional. Of those employed in the production department, the quota is, roughly, six Canadians to one Czech instructor.

At present, 82 Czech workers, women and men, are employed, with the remaining 190 coming from Frankford, Trenton and Belleville and the surrounding district. This represents a distinct curtailment of the number of unemployed in the area.

## Canadian Granite Used

To Build Dominion's War Memorial Unveiled By The King

Canadian granite was used in the construction of the Dominion's war memorial which was unveiled by the King on the recent visit of their Majesties to Ottawa. Fifty-nine blocks were employed in building the monument, their total weight amounting to 828 tons. The largest piece weighs more than 42 tons, was cut from a block which, when quarried, weighed 60 tons.

## HOME SERVICE

MAKE GAY SLIP COVERS TO REVIVE OLD CHAIRS

## Easy to Get Professional Fit

How discouraging a shabby chair can be—especially when the budget is small. But by making a slip cover for it you can revamp an old chair at little cost, have just the style and fabric you want.

And what smart styles, lovely fabrics there are! The slip cover sketched is a modernistic design in rust on beige cotton crash, with most trimming in rust. To make it—or any cover for chair or sofa—use just what the simple plan shows.

Remove cushions, smooth fabric down back and over seat. If you use moss trimming, work with the fabric wrong side out. Pin every three inches along edges of chair and cut, allowing 1½ inches outside pins for seams. In the same way fit fabric directly to the arm, sides, and back. Then to baste parts together, try on for last-minute adjustments before final stitching.

You will find each step in making slip covers clearly explained and diagrammed in our 32-page booklet. Tells how to cut, fit, and finish covers for all types of chairs and sofas. Gives tips on smart color schemes, fabrics, trimmings.

Send 15c in coins for your copy of "How to Make Slip Covers" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

The following booklets are also available at the same price:

- 155—"Glass Gardens and Novelty Indoor Gardens"
- 176—"How to Improve Your Bridge"
- 147—"How to Budget and Buy for Better Living"

## For Greater Safety

Mr. Wismer's proposal for an amendment to the Motor Vehicles Act demanding that pedestrians walk on the left of the highway facing the traffic is a timely and needed measure, states the Vancouver Sun. Any one who walks on the right with the traffic at his back, especially in the dark, expecting car light to pick him out of the shadows, is taking the risk of involuntary suicide.

## Valera Abandons Visit

A short wave broadcast from London received in New York, said that the proposed visit to the United States of Eamon de Valera, premier of Eire, had been abandoned.

## Cost Of Sand Bags

Demand In Britain Causes Prices To Soar

With a crisis, the price of sandbags in Britain goes up. And with a war, prices soar.

Sandbags which cost about five cents in June now cost eight to 10 cents. Price rose two shillings (44 cents) a hundred in the week before the declaration of war.

Much of the jump used to make sandbags comes from Calcutta and with the close of British Mediterranean shipping, cost of shipping increased, and private firms could no longer guarantee deliveries.

Another factor was the demand of the government for all available bags. Authorities stress that the uncertainty of shipping and the government demand, and not profiteering, were the primary causes of the rise.

Filler for the bags has also become more expensive, with sand being taken from seven shillings (5.54) to 10 shillings (\$2.20) a ton. Because sand cannot be obtained quickly enough, sandbags in many places are being filled with earth.

## Octopus Attacks Dog

Overpowered After Owner Put Up Fight With Garden Fork

While chasing seagulls at Mordialloc, near Melbourne, Australia, a heavy Alreide dog was attacked by a nine-foot octopus weighing 40 pounds.

The dog was rescued by its owner, Harry Leach, an elderly man, who fought the octopus with a garden fork.

After a long struggle, Reuter states, the octopus apparently came exhausted, and Mr. Leach dragged it ashore, still wrapped around the dog.

## SELECTED RECIPES

## ECONOMICAL CUP CAKES

1½ cups sifted Swans Down Cake Flour  
1½ teaspoons baking powder  
¼ teaspoon salt  
¼ cup sugar  
1 egg, unbeaten  
½ cup milk  
½ teaspoon vanilla

Sift flour, measure, add baking powder and salt, and stir together three times. Cream butter thoroughly, add sugar gradually, and cream together until light and fluffy. Add egg and beat well. Add flour, alternately with milk, a small amount at a time, beating well after each addition. Add vanilla. Bake in greased cup-cake pans in moderate oven (375 degrees F.) 20 to 25 minutes. Makes 12.

## DESSERT DOUGHNUTS

2½ cups sifted Swans Down Cake Flour  
2 teaspoons baking powder  
¼ teaspoon salt  
¼ teaspoon nutmeg  
2 eggs or 4 egg yolks, well beaten  
½ cup sugar  
½ cup heavy cream

Sift flour once, measure, add baking powder, salt, and nutmeg, and stir together three times. Beat eggs until very light and thick. Add sugar and continue beating until light and fluffy. Add flour, alternately with cream, a small amount at a time, beating after each addition until smooth. Turn out on well floured board and knead lightly 30 seconds. Roll ¼ inch thick; cut with floured ¾-inch doughnut cutter. Fry in deep fat (370 degrees F.) until rich brown, turning frequently. Drain on small paper. Cool, sprinkle with confectioners' sugar. Makes 30 small doughnuts.

## FILLING SANDBAGS TO MUSIC

## SUAVELY GRACEFUL FALL STYLE

By Anne Adams

"Fit for a queen" . . . and designed just for you, this Anne Adams dress. It has such breathtaking new features that no one will even notice your extra pounds, yet it's easy-drape to make. See how the belt brings in the contrast idea, so smart for fall, by having tabs and a stitched-on tie of bright color. A gay note on black or brown! The darted waistline keeps your diaphragm smooth and releases fullness above, matched by gathers below the devastating, triple-scalloped yokes. The neck-line curves to a low V. Make sealop-trimmed sleeves in three-quarter length, or have short puffs. All in all, Pattern 4220 makes a dress you'll wear with pride!

Pattern 4220 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Sizes 36 takes 3½ yards 38 inch fabric.

Send twenty cents (20c) in coins (stamps cannot be accepted) for this Anne Adams pattern. Write plainly Size, Name, Address and Style Number and send order to the Anne Adams Pattern Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

Chinese Girl On Medical Research Staff Of Toronto University

Dr. Mary Wong, young Chinese girl, has been appointed to the staff of the department of medical research, University of Toronto, under the direction of Sir Frederick Banting.

Dr. Wong, daughter of a London, Ont., restaurateur, took her B.A. and M.D. degrees at the University of Western Ontario. She served for a year as an interne in a Saskatoon hospital and for another year at Victoria hospital in her home city of London.

She was a star basketball player at Western.

The earth's great polar ice caps and glaciers are made up of snowflakes.

## SUNDAY SCHOOL LESSON

OCTOBER 8

## THE FORERUNNER OF THE KING

Golden text: Make ye ready the way of the Lord, make his paths straight. Matthew 3:3.

Lesson: Matthew 3.

Devotional reading: Malachi 3:1-6.

## Explanations And Comments

The preaching of John the Baptist, Matthew 3:1-12. And in those days cometh John the Baptist in the name of the Lord. Jesus was still living in Nazareth, but some 30 years after he was taken there as a slave from Egypt, those years which are called "the silent years," or "the hidden years." Jesus was ready to begin his public ministry, and John was the herald to arouse the expectation of the people for the coming of the King. It was in the fifteenth year of the reign of Tiberius Caesar, Pontius Pilate being governor of Judea and Herod tetrarch of Galilee, Mark records.

In the wilderness of Judea he preached and called upon the people to repent. Dean Bosworth paraphrases his words, "Repent ye, for the kingdom of heaven is at hand." "Change your hearts; for God is introducing among men a new order of things." Countless have been the attempted definitions of the phrase "the kingdom of heaven." I like that given by Dr. Cuddeback: "The manifestations of God's life and love in the affairs of men."

John, writes our Evangelist, is the one spoken of by the prophet Isaiah (40:3-5) when he says: "The voice of one crying in the wilderness. Make ye ready the way of the Lord, level his paths for him" (Moffatt's translation).

The Baptism of Jesus, Matthew 3:13-17. When Jesus came to John to be baptized, John told him that it was more fitting for himself to be baptized by Jesus. But Jesus answered him, "Come now, this is how we should fulfill all our duty to God" (Moffatt's translation). Jesus' baptism was a public endorsement of the mission of God; the baptism was of God (Mt. 21:25), hence he submitted to the righteous baptism of John. John, who was later enjoined on his followers, and therefore he would himself submit to it, and it was for him a formal setting apart, consecration, for his great mission.

Now when Jesus had been baptized, the heavens opened. The open sky was the revelation to Jesus of man's cause of heart disease. A child who suffers from swollen joints or muscle pains should have prompt medical care. The "poison" of rheumatic fever may affect the valves and muscle of the heart. It may be years before the damage is discovered. Promptness in recognizing this condition with prompt medical care and after care may save the heart from serious injury. There is nothing so valuable in promoting health as the early discovery and treatment of heart conditions.

## Treasures Are Protected

Coronation Chair Is Removed From Westminster Abbey

All movable treasures in Westminster Abbey, including the Coronation Chair in which sovereigns in England gave their oaths since 1272, have been removed to places of safety.

The chair, which stood in the Chapel of Edward the Confessor, and another chair, that of Queen Mary II.—made in 1689 for the Coronation of William III. and Mary—were carefully packed and taken by train to an unknown destination in the country. The exquisite stained glass windows, some dating back to the 13th century, have also been removed.

Other objects taken to safety were historic 16th-century prints and plates from the Houses of Parliament—valuable have also been removed from the British Museum, the National Gallery, the National Portrait Gallery, the Victoria and Albert Museum, and the Wallace collection.

## Premier Of Russia

Molotov Has Just Recently Eaten To Place Of Importance

Known to those under him as "Little Tar," by reason of the power he wields in the affairs of the Soviet, Molotov, the Russian Premier responsible for the bombshell of the German-Soviet pact, is next to Stalin, considered the most important man in the country.

It is, however, only recently that he has risen to his present heights at the Kremlin. For Molotov, whose real name is Viacheslav Scriabin, and who is descended from the Russian music composer of that name, was once disparagingly referred to by Lenin as "the best filling-clerk in the Soviet Union."—News of the World.

Brilliant playing cards are now available to blind persons, who, by the way, because of their unusual power of concentration, are better-than-average bridge players.

An electrically lighted fishing pole is a cute idea, but the inventor made the mistake of telling a game warden about it in New Mexico, where night fishing is illegal.

Elderly Lady: "Isn't it wonderful how these filling station people know exactly where to set up a pump and get gas?" 2327

**Health LEAGUE OF CANADA**

presents  
**TOPICS OF VITAL INTEREST**

by **DR. J. W. S. McCULLOUGH**

**LIVE LONGER**

When you have lived to middle life you may feel as hearty and vigorous as ever you did, but it would be wise to have your heart examined at regular intervals.

One's arteries usually gradually harden as the person grows older. This condition is particularly serious when it affects the arteries upon which the heart muscle depends for its nourishment. If one of these arteries (coronary arteries) hardens and thickens its diameter narrows, the circulation is clogged and the heart weakens. In advanced cases this condition is known as arteriosclerosis or coronary heart disease. Usually a condition of past middle life, it may occur in persons of 50, 40 or even younger.

The newspaper headlines of sudden death from heart disease are produced among men and women who didn't know that there was anything wrong with their hearts. The way to find out is by consulting a competent doctor who after examination will tell you. In the earlier stages of the affection there may be no pain, no shortness of breath and the person feels well. That is the time to make sure about your condition. After 40 it is a matter of wisdom to see your doctor regularly, that is at least once a year. Many lives would be prolonged in comfort if this were the common practice.

In young persons as well as in the older, rheumatic fever is a common cause of heart disease. A child who suffers from swollen joints or muscle pains should have prompt medical care. The "poison" of rheumatic fever may affect the valves and muscle of the heart. It may be years before the damage is discovered. Promptness in recognizing this condition with prompt medical care and after care may save the heart from serious injury. There is nothing so valuable in promoting health as the early discovery and treatment of heart conditions.

Editorial Note: Readers desiring the complete set of Dr. McCullough's "Topics of Vital Interest" may secure same by writing to: The Health League of Canada, 105 Bond St., Toronto, Ont.

## Plowing Experiments

Shown That Shallow Plowing Produces High Yields

Experiments conducted by the Field Husbandry Division, Dominion Experimental Farms, have shown that shallow plowing produces as high yields as deep plowing at a considerable saving in power requirements. Furthermore, tillage beyond that required for weed control and reasonably good seed bed preparation has no beneficial effect on yields.

In many districts of the prairie provinces plowing for summer-fallow has been largely dispensed with in favor of the "plowless fallow" by surface cultivation. In eastern Canada plowing and land in the summer with after-harvest cultivation where weeds are troublesome, and plowing in late fall on less weedy land, have both proved superior to spring plowing, especially on heavy soils. One advantage of summer or fall plowing is that it facilitates the early seeding of cereal crops which experiments have clearly shown to be very desirable.

## All In The Business

The three men were conversing in the smoking room of the hotel.

"Yes," said the Englishman, "my family is fairly well connected. I have traced some of my ancestors and found the one of them held up Queen Anne's train."

"Speaking of trains," said the American—"it ain't so many years ago that my grandfather held up a train in Texas."

"Queen," said Pat, "my all seem to be in the holdup business. My father manufactures suspenders."

## Made Long Stay

After six weeks stay, M'Nab grudgingly gave the hotel porter a shilling.

"Ye know, when I was in Paris tips cost me nigh on ten shillings," he said.

"Were you there many years, sir?"

**THE FEELING IS GENERAL**

CHAPTER V—Continued

It was July, the Montagnais "Moon When the Birds Mourn", and the trade was at its height at Fort George. Gradually the coast Crees were taking their families to summer fishing camps on the coast islands where the Hearne's salmon, sea trout and whitefish were schooling before ascending the rivers to their spawning grounds, and where the Canada geese, pintail and black duck would flock with their new broods. Remnants of the great icefield from Hudson's Straits, Fox Channel and the Bay of God's Mercy which had besieged the coast in the spring, now drifted far in the great bay, slowly vanishing under the sun and the warm rain winds.

The remaining days of his stay were busy ones for Alan. There were supplies to be carefully checked, all of which he bought with his credit at the posta. The money McCord had given him he hid carefully under the floor of his cabin. The extra flour, beans and sugar Noel got through Montagnais, as well as the extra gill-net which might some day, in the heart of the unknown country, save their lives. Fearing the havoc which the tongue of Mrs. Hanbury had undoubtedly created at the Revillon Freres through the oily Rivard, for days Alan avoided the eating with Berthe. But at last, hungering for the sight of her face, driven by the desire to defend himself, he went to the Revillon Freres.

Gabriel Desnais and Pierre were busy with Indians, so Alan waited until the factor was free. As he lounged against the counter, Arsene Rivard entered the room, saw Alan, flushed and went at once to the desk behind the counter where he busied himself with an account book.

So she's been here, surmised Cameron. Berthe knows Mrs. Hanbury came to my house. Rivard's lost no time telling her mother some wild lie about that call. There's little chance for me now, with Berthe.

Finishing with the Indian, Gabriel Desnais approached Alan and gave him a hearty handshake. "How are you, Alan? They tell me you got the dogs you were after. Come outside where I can talk to you."

In the empty clearing Desnais began: "You start with the police this week McQueen tells me. That is good."

"Good?" protested Alan. "I can't help myself, can I?"

"No, but your going to Whale put yourself in a bad light here, Alan. Everyone thinks you met this McCord."

"Do you?" Alan looked hard at the kindly Frenchman.

"You say you did not. For me

**Fiery, Itching Skin Gets Speedy Relief**

Here is a clean stainless steel anti-septic new dispenser for chemical relief, that will bring you speedy relief from the itching and distress of Eczema, Itch, Toes and Feet, Rashes and skin troubles. Not only does this great healing antiseptic promote rapid and healthy healing in open sores and wounds, but it also relieves itching and burning. The relief of eczema is instantly stopped; the eruptions dry up and fall off. It is very rich in skin oils and is very rich in skin oils and is very rich in skin oils.

It is the only skin cream that can be used on all skin types. It is the only skin cream that can be used on all skin types.

rena. He said it was a branch of the Kokosak, but no white man has ever been there. It's a country where even the Indians starve when they miss the deer migrations."

Alan bade the trader good-bye, then, braving the angry face of Madame Desnais, went dejectedly to say his farewell to Berthe. At the door where once he had been welcomed, he kept waiting by what, judging from the sound, appeared to be a heated argument, punctuated by the shrill voice of his friend, little Manon. At last the door was opened by Berthe.

"I am leaving in a few days," he said, probing her dark eyes in an attempt to read her thoughts. "I've come to say good-bye, Berthe."

"Come in, Alan," he said, with a faint smile.

"Berthe," he began, "I can't go, with you feeling this way!"

Rivard and this woman! I know. You don't understand what she's up to."

"I understand this much," the girl retorted bitterly. "She was at your party. She boasted to Madame Martin, at the Northern Trading Company, that she had twisted you round her little finger." Berthe flung back caustically, her black eyes snapping as blood flushed her dark face.

There were tears in his eyes as he watched her wrestle with pride and doubt and the loyalty of years. "Oh, it's not that! You're wrong! It's not this woman!" she protested. "It's your suddenly going up the coast when you'd been away so long! You went to see Nell Campbell! You know you did! Everyone believes it! It's that you went away and did not tell me the truth. You couldn't care so much for me and do that. It's that I've lost faith in you—that's all!" With a sob and a faint "Good-bye, Alan!" Berthe ran from the room.

## CHAPTER VI

There were only a few friends to bid Alan and Noel good-bye on the beach at the Hudson's Bay Company when they loaded the canoe for the long trip to the headwaters. But, at the Revillon Freres, the entire population watched Trudeau and Goyette, McQueen's helpers, with two hired Montagnais canoe-men, stow the outfit in the two police canoes. Near them, Desnais and Rivard talked to McQueen, Slade and Mrs. Hanbury.

Shortly, the police and the woman who had turned Fort George into a hotbed of gossip withdrew from the group and talked, heads together, in low tones. Then, after hurried good-bye, the two boats headed for the far shore where Alan, with his four Ungavars running the beach, was riding the flood tide.

Later, in front of the Northern Trading Company, a sea-plane taxied up the river, lifted the mail in a loop returned and passed over the police canoes.

Three days upstream, where the Big River roars down from the high plateau in a series of falls and chutes and the Indian trail, for a hundred miles, follows a chain of lakes, Alan brought McQueen and Slade to his camp.

"We're going to see a lot of each other in the next few months," began the older officer, "why can't we shake hands on this and be friendly?"

"What do you mean, friendly?" Alan demanded, Alan, studying the insinuating, close-set eyes of the other. "You're police. You can give me orders."

Day after day, the men slaved on pole, paddle and tracking line as they ascended the great river. As the August days drew to a close and the nights sharpened with frost the canoes reached the forks in the high tundra country. Northeast, three days hard poling up the strong water of the Mad River, was Alan's hunting country.

Fifty miles to the east, on the Talking, stood a cabin in a clearing where a man waited with a girl for the coming of a canoe. Far to the south, the great lakes Nicheum and Patensim emptied into the Conjuror, the largest of the three branches.

The night the canoes reached the forks, the police came to Alan's camp.

"Well, Cameron, we're here," said McQueen, with a sigh of satisfaction, lighting his pipe with red ember from the supper fire. "Now it's up to you to decide whether you're going to stay stiff necked and later pay the penalty of the law, or will decide to be sensible and talk."

"We've been all over this, sergeant," demurred Alan, with an air of indifference which belied the anxiety that harassed him. "It's not up to me. It's up to you. You say McCord is somewhere in this country. Now which river are you going to take to the height-of-land?"

For a space McQueen closely studied the baffling features of the man whose gray gaze did not waver. Then his shaggy brows met and his pale eyes glittered, ominously.

"We're going to cover all three rivers before the ice," he snarled.

Alan glanced at Noel. There was not time to cover the wide headwaters of even one river before the ice. His heart pulsed in his throat as he asked with seeming indifference: "Well, which first?"

"Your country on this north branch, you say," McQueen leaned toward the other as he went on, insinuatingly: "Well, young man, I figure that's just where you ran into McCord—in your own country."

Like a flash, inspiration came to Alan. Here was his chance! Slowly over his bronzed features crept a look of frustration-of defeat. His eyes shifted before the fixed stare of the policeman, as, expelling the breath from his lungs in a deep sigh, he horrified the listening Noel with: "What's the use! You're bound to get him before you're through—you police always do, they tell me. We met McCord last winter on the headwater lakes of the Mad River."

"We've been all over this, Sergeant," demurred Alan.

On the Indian's swart features there was a lightning swift transition from a look of pained surprise to one of stoic acquiescence. Gravely he nodded agreement with Alan's startling admission, as he met Slade's sudden glance.

"Ah-hah! So that's it, is it?" With a grunt of satisfaction the delighted McQueen thrust out his big hand and gripped Alan's. "Now you're talking like a good citizen, my boy!" he cried, slapping the hunter on the back. "Shake with the boys, Tom. I knew they'd come through!"

So with much handshaking and patting of Alan's broad back the police left to cross to their camp. When they were well out of hearing on the moonlit river, Alan turned to Noel.

"It was our best chance," he said, "to send them up the Mad River. We'll take them into the Caribou Lake country and lose them, while one of us strikes cross country to the Talking and wins John. I was afraid, Noel, they'd want to try the Talking first, so I threw up my hands to head them off."

"Ah-hah! We get dem een doo manee lette lac, we're de water run bet way, den wey not get out till de ice."

For a long space Alan sat staring into the fire. "I'll give John a chance to lose himself somewhere over the height-of-land before they come back here to the forks and start with their dogs to hunt for him on the first snow."

"What dey we doo we—doe police, wey den dey wid tem?"

"This will make us outlaws, Noel—helping a man wanted for murder. Outlaws!"

The Montagnais "Moon of the Falling Leaves" was riding the sky above the tundra-sentinelled valley of the

Talking River. The days of the long twilights were over and, earlier and earlier, the swarming auras stippled the violet sky. One September morning, a girl stood on the shore of the river beside a path leading back through the timber to a clearing. She wore heavy whippers, breeches, laced below the knees, high woolen socks and moccasins. At her belt of plaited caribou hide hung a small skinning knife in a sheath ornamented with colored beads. In her strong, round arms, from which the sleeves of her gray, woolen shirt were rolled high above the elbow, was a bundle of washing.

The girl put the clothes to soak in a small pool dug in the sand beach, then dropped her knees and with a finger idle made tracings in the sand. After a while the swish of whipping wings caused her to lift her eyes. Within a few yards of the shore three sheldrake skittered downstream. A Canada Jay croaked from an aspen whose yellow leaves shivered in the breeze. She looked at her tracings and smiled as she read the name, Alan Cameron. Again there was a whipping of wings and five sheldrake passed.

"I wonder what's startled the ducks?" she said aloud, glancing up river.

Far above her Heather made out a dark object moving along the opposite shore downstream, appearing only to disappear again among the willows and alders.

"A bear!" she cried.

Then her mouth opened slowly in surprise as she stared at the opposite shore. "Why—there it is!" she gasped. "But it's not a bear! It's—it's a dog! It can't be! Yes, it is, it's—who-ho! Roughly! Roughly!" she cried, delicious with excitement as she danced on the beach.

Like a statue, on the opposite shore stood a black husky with white face markings, chest and socks, intently watching her.

"Roughly! Roughly!" she called, frantically waving her arms at the motionless animal, while tears blurred her eyes. "Oh, they're back! Alan's back!" she repeated ecstatically, between sobs. "He didn't forget us! Alan's back!"

The watching dog went quick with life. With a wild yelp he plunged into the swift river, his powerful legs driving him like piston rods. Keeping ahead of him was the other, fiercer, carried him downstream, the girl followed the shore, calling to him as he swam.

"Roughy, dear old Roughy! Where's Alan, boy?"

His feet touched bottom and, with a hungry gasp, he shook the water from his mane. The great dog sent the water flying, then froze as if carved from stone, ears forward, nostrils working, as he studied her through oblique eyes.

"Roughy, don't you know Heather?"

He reached her with a bound, sniffed at her outstretched hands, then rearing, as he whined his recognition, beat her shoulders with his great paws while his red tongue sought her face.

Circling the wet neck of the wriggling dog with his arms, Heather kissed the white star on the massive skull, then with the yelping husky leaping beside her, she returned to the landing beach. There, leaving her, he quickly disappeared up the path to the cabin and as quickly returned.

"Where did you leave Alan, Roughy? Where's Alan?" she demanded, seizing the dog by his jaws and looking into his brown eyes.

The husky sprang away from her and stood with nostrils working, gazing at the opposite shore; then, yelping, he plunged into the river.

"Who-hoo-o! Heather!" drifted across the water. There, on the stony beach stood a man, a tumpine across his forehead supporting the pack on his back. Beside him romped three huge dogs.

Heather waved in return, her knees shaking with excitement and the joy of seeing him. "Who-hoo-o-o, Alan!"

Running to a canoe lying bottom up on the beach, she turned it and, lifting it by the gunwale, slid it into the stream and paddled hard in the wake of the swimming Roughy.

"You—you kept your word! You didn't forget us!" she choked, winking back the tears as the boat grounded.

Alan dropped his pack and seized both the girl's hands as he swung her from the canoe. "Heather McCord," he laughed, his appraising eyes sweeping her strong, graceful figure from golden crown to moccasins. "What a big girl you've grown since I saw you!"

"Oh, dad! I be so glad, Alan! He was beginning to think—"

Cameron's bronzed features sobered as he thought of the police he had seen at the Mad headwaters. "But you, Heather, you knew I'd keep my word?"

She nodded: "Yes, I knew. What a shock Roughy gave me, Alan! I

## Lifts Grease OFF POTS AND PANS

No need to scrape and scrub in slimy water. A solution\* of Gillett's Pure Flake Lye just lifts off grease layers... loosens hard-baked food... takes the drudgery out of washing up. Keep a tin always handy!

\*Never dissolve lye in hot water. The action of the lye itself heats the water.

**FREE BOOKLET**—The Gillett's Lye booklet tells you the many ways in which this powerful cleanser cleans dishes... keeps out-house clean and odorless by destroying the contents of the closet... how it performs dozens of tasks. Send for a free copy to Standard Brands Ltd., Toronto, Ont.

thought he was a bear when I first saw him upstream."

"Knew me? He swam over when I called and almost smothered me, the old bear."

"That's more than I did, Heather," he laughed.

Heather's eyes fell before his. "Oh, you got your dogs and what beauties!" she cried as the three Ungavars thrashed in the water of the shore, yelping at the swimming Roughy.

"Two slate-gray and a brown one! Don't be so glad! Why he's talked about nothing but your coming back."

"Here you, Shot, Powder!" he called. "Come here! Don't try to touch them now, Heather. You're shy of strangers, aren't you, Rogue, you old sinner!"

The dogs came in from the water and gathered around Alan.

## Another Discovery

Scientists Take Temperature Of Fingers To Gauge Emotions

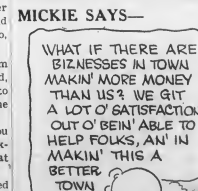

Taking the temperature of the fingers is a new method of gauging emotions, just announced by two New York physicians at a scientific meeting at Palo Alto, Cal. Tension, anxiety and conflict reduce the temperature by as much as 23 degrees in an hour, it is said. Anger, fear, depression and elation produce a lesser cooling, while thoughts of love and marriage send the Fahrenheit upward.

All this may be very scientific and may even revolutionize the process of psychological diagnosis. But it also suggests a new technique for anxious young men to adopt with a bashful subject toward the objective of holding hands in the moonlight.

A fifteen hundred-year-old pair of iron horseshoes from Europe is an exhibit at the Field Museum of Natural History, Chicago. 2327

## Local News

Miss Ethel Wilson was a Calgary visitor last week.

Mr. and Mrs. Wilfrid Dutil are spending a few days in Calgary.

Mr. and Mrs. J. Jackson have been added to the staff of the Grand Union hotel. Mr. Pruet is at present at Cochrane.

Edward G. Robinson stars as G-Man in "Confessions of a Nazi Spy." Preview at Palace Sunday night; Thursday, Friday and Saturday next week at Cole's Theatre, Bellevue.

A soldier in Calgary appearing in a civil case was told by the judge that his debts came ahead of the Army. A man cannot escape his debts on the plea of military service.

Mrs. W. Bell and daughters will move to Nelson, after living here for many years. The Savoy hotel in that city has been leased and Tom McGovern, to whom Miss Mae Bell was recently married, has already left here to commence work there. For about 20 years Mrs. Bell and the late Mr. Bell managed the Grand Union hotel here.

On Monday evening the Ladies Guild of St. Alban's church met at the home of Mrs. Halliwell, and the guest of honor was Mrs. John R. Hague, bride of Rev. J. R. Hague. A Pyrex shower was held, contributed to by the ladies. Mr. Hague, who was present, expressed the thanks of Mrs. Hague and himself for the kindness of the ladies. Whist was played, the prize going to Mrs. W. E. Gate, and the consolation to Mrs. T. Rose.

Because a certain high standard of quality is assured, the selection large, and the price reasonable, satisfaction is natural when you buy at
